## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

*CBS News National Poll, June #2, 2011*

- 1) **Undocumented Variables:** No information was provided for variables **COVR, KAPP, BTCH, FLIP, FLP2, FLP3, and FLP4.**

## Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

**Table 1: Distribution of Variables by Percentage of Missing Values**

Variable Name and Label (Total Cases = 1045 )	Percent of Cases with Missing Values
84.8% ( 67 of 79 variables)	have 0% Missing Values
0.0% ( 0 of 79 variables)	have 0% - 1% Missing Values
0.0% ( 0 of 79 variables)	have 1% - 3% Missing Values
0.0% ( 0 of 79 variables)	have 3% - 5% Missing Values
0.0% ( 0 of 79 variables)	have 5% - 10% Missing Values
5.1% ( 4 of 79 variables)	have 10% - 20% Missing Values
Q7	Opinion Cain 10.2%
Q8	Opinion Gingrich 10.2%
Q9	Opinion Paul 10.2%
Q10	Opinion Romney 10.2%
5.1% ( 4 of 79 variables)	have 20% - 40% Missing Values
CD	Congressional District 29.3%
URBN	urbanity 29.3%
MSC	msc code 29.3%
FEMM	Number of female adults 29.3%
5.1% ( 4 of 79 variables)	have 40% - 99% Missing Values
Q47	Friend/Relative Died Sept 11 Attack 72.9%
PEDU	Post Grad Degree 82.7%
I250	Income Over 250K 85.6%
NPH0	number other phones 81.6%
0.0% ( 0 of 79 variables)	have 100% missing values

### **Variable Description and Frequencies**

**Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.**

**Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.**
